Summary

A dedicated **Front-End Web Developer** with one year of experience in website development and design, specializing in **HTML, CSS, and Bootstrap**. Demonstrated expertise in creating **responsive, user-friendly websites** with a strong emphasis on performance and design. Key achievements include successfully completing an individual internship at NxtWave, where I developed a fully responsive clone of the Nxt-Talks website, and creating a website leveraging **AI technology** for the **Foresight Energy project**. Now seeking for an intern position at a forward-thinking organization, where I can apply my skills to contribute to innovative and user-centered digital solutions.

Education

KL University	Vijayawada, India
Bachelor of Technology	07/2023 - 05/2027

Skills

Python · C programming · Cricket · CSS · Front-end · Github · HTML · Java · Javascript · Bootstrap · SQL · C++

Projects

Restaurant Foods

It is a basic static front-end design as my first project.

- A basic static front-end design project developed under the guidance of Nxtwave's CCBP 4.0 Academy.

Foresight Energy

Development of a website leveraging AI capabilities.

- Created a website using AI technology.

Personal Finance Management System

A project focused on managing personal finances effectively.

- Currently working on developing a system to manage personal finances with ease and least miscalculations.

Interests

⭐ Cricket

Passionate about **cricket**, especially the shift from **Test to T20** formats, reflecting adaptability and strategic thinking.

🏆 Learning a new skill

It encourages me to boost myself with latest technologies and information.

Certification

AWS Cloud Foundations

Basic Python Programming

Experience

NxtWave	Online
Front End Developer	12/2024 - 01/2025

Company Description

- I completed a one-month **individual** internship at NxtWave, where I independently cloned the **NxtTalks** website as a **static website**. This project involved using **HTML, CSS, and Bootstrap** to create a fully responsive and visually appealing design, along with **JavaScript** for basic interactivity. Through this experience, I enhanced my front-end development skills, improved my ability to replicate UI designs with precision, and gained hands-on expertise in building structured, static web applications.
